

Find One In Common!

Your Goal

You and another user online should have 7 objects in view. However, your view is centered slightly differently from your partner's, and only some objects are in common. Your goal is to chat with your partner and find one object you have in common!

Instructions

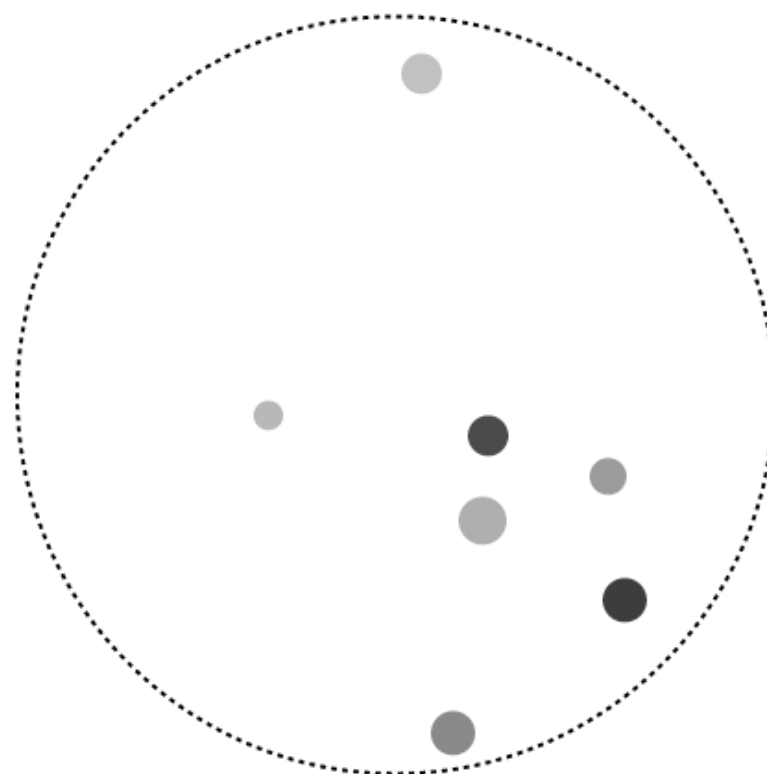

- Look at **your view on the right**.
- Use the **chat box below** to find one object you and your partner have in common.
- Please use **natural sentences** as much as possible!
 - You should ask questions and describe your view in many ways.
 - Do not use complicated numbers (e.g. 11:59, 1.5cm, 75%).
 - Do not talk about things that are irrelevant to this task.
- Finally, **click one object in your view** that you found in common. You can select anytime after 1 minute, but **do not select before you are very sure you found one object in common!**
- Note: Please be aware that we will not accept chats which (i) did not follow instructions (ii) did not make good attempt to succeed. If you find problems with the task or your partner, **please return and do not submit that HIT**. We give additional \$0.05 bonus if you successfully find one object in common.

Time Remaining: 5:43

[06/25/18 05:38:51] <You entered the room.>

[06/25/18 05:39:12] <Your partner has joined the room.>
